TECHNICAL
UNIVERSITY**

**JSC «Kazakh-British Technical University»
School of IT and Engineering**

SYLLABUS

Discipline: INFT4244 UI/UX Design

Term: Spring 2026

Instructors full name: Dilyara Akhmetova, Aron Karatayev

Personal Information about the Instructor	Time and place of classes		Contact information	
	Lessons	Office Hours	Tel.	e-mail
Dilyara Akhmetova	According to the schedule	According to the schedule		d.akhmetova@kbtu.kz
Aron Karatayev	According to the schedule	According to the schedule		ar.karatayev@kbtu.kz

*Course instructors are available to you to assist and answer your questions individually during the office hours. Each instructor's office hours will be announced and will be shown on instructor's office door.

COURSE DURATION: 3 hours a week, 15 weeks, 45 class hours

PREREQUISITES

None

GENERAL COURSE AIMS

This course aims to provide students with a comprehensive understanding of User Experience (UX) and User Interface (UI) design principles. By blending theoretical concepts with practical application, students will learn to create intuitive, accessible, and user-centered digital products. The course fosters creativity, critical thinking, and problem-solving skills essential for designing effective user interfaces and experiences.

COURSE DESCRIPTION

The 15-week UI/UX Design course introduces students to the dynamic and essential realms of

User Interface (UI) and User Experience (UX) design. Students embark on a structured exploration, commencing with foundational concepts in weeks 1-2, understanding the distinctions between UI and UX. The syllabus navigates through user research methods, information architecture, wireframing, prototyping, and interaction design, ensuring hands-on proficiency. Visual design principles, usability testing, and responsive design strategies are delved into, offering a holistic perspective. The midterm and endterm assessments evaluate theoretical understanding and practical application.

COURSE OBJECTIVES

By the end of the course, students will be able to:

1. Understand the principles and methodologies of UX and UI design.
2. Create user personas to inform design decisions.
3. Apply design thinking and iterative processes to solve real-world design challenges.
4. Develop prototypes and mockups using industry-standard tools.
5. Evaluate and improve design solutions through usability testing and feedback.
6. Explore visual design principles, including typography, color theory, and layout.
7. Create responsive designs that work seamlessly across different devices and platforms.

COURSE OUTCOMES

Upon successful completion of this course, students will be able to:

1. Design user-friendly and aesthetically pleasing digital interfaces.
2. Create detailed wireframes and prototypes.
3. Demonstrate proficiency in design tools such as Figma.
4. Present design solutions effectively, articulating their alignment with user needs and business goals.
5. Build a portfolio of UX/UI design projects to showcase their skills to potential employers or clients.

COURSE ASSESSMENT CRITERIA

Assessment occurs continuously throughout the course. The evaluation will be based on the levels of (maximums in %):

COURSE ASSESSMENT CRITERIA

Assessment occurs continuously throughout the course. The evaluation will be based on the levels of (maximums in %):

Type of activity	Final scores
SIS	30
Midterm/Endterm	30
Final exam	40
Total	100

TASKS

for students' independent study (SIS)

Week	SIS	Cost (in points)
2	Wireframe	5
4	Design, components and constraints	5
6	Design system	5
10	Autolayouts and variants	5
13	Clickable prototype	10
	Total	30

COURSE CALENDAR

Week	Classes				
	Topic	Lectures , hours	Lab, hours	Seminar s, hours	Practice works
1	Who is a UI/UX designer - Digital Transformation - Design systems - The process of working on a UX project.	2	0	1	Practice work #1
2	Design Thinking - Common features of design thinking - Empathy - Focusing and generating ideas - Prototyping, ideal prototype - Testing	2	0	1	Practice work #2
3	CJM (Customer Journey Map) - Customer Journey Map: why and why not - CJM Basics: 3 Steps - Preparing to build a CJM. - Experience diagnostics	2	0	1	Practice work #3
4	UX Design. Patterns and psychology	2	0	1	Practice work #4

	• Patterns of user behavior • Psychological effects • Visual test and design • Prototypes and mock-ups				
5	Usability basics • What usability is today? • Interface Elements • Usability and the mobile browser • Usability Testing	2	0	1	Practice work #5
6	UI/Visual Concept I • Stages of visual concept • Typography • Color	2	0	1	Practice work #6
7	UI/Visual Concept II • Iconography, illustrations, and photos • Mood board • Composition	2	0	1	Practice work #7
8	Midterm				
9	Forms and UX research • Design Project. What it is and how to manage it • Research in the Empathy phase • Identifying user needs • Basic types of forms • Arrangement of forms	2	0	1	Practice work #7
10	Mobile UX/UI • Basic iOS principles • Android basics • Basic platform differences • Information structure • Basic product metrics	2	0	1	Practice work #8
11	UX in e-commerce • What is e-commerce? • Customer Journey Map in e-commerce • Types of Calls to Action (CTAs) in e-commerce	2	0	1	Practice work #9
12	Industry Practices and Trends • Exploring the future of UX/UI • Case studies of successful UX/UI projects • Staying updated with current trends	2	0	1	Practice work #10
13	UI/UX Designer Portfolio Development	2	0	1	

	- Applying UX/UI principles to a comprehensive real-world project - Creating a polished portfolio showcasing skills and projects				
14	Endterm				
15	Course revision				

Course assessment schedule

No	Assessment criteria	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	
1	SIS		*		*		*				*			*				30%
2	Midterm/ End-term								*						*			30%
3	Final exam																*	40%
	Total																	100%

GRADING

Grading, attendance and examination policies and procedures will be applied to the course in accordance with stated KBTU rules of conduct and discipline.

EXAMINATION POLICY

There will be a continuous assessment throughout the course in the form of practice works, two mid-terms, 5 SIS works and one final non-cumulative examination, which will consist of quizzes (multiple- or single-choice questions, fill the gap, true-false, problem solving).

The instructors will announce the date and time of each examination in advance.

Class sessions – will be a mixture of information, discussion, and practical application of skills.

Practice – will reinforce the students' knowledge by practical appliance of lectured materials.

In-class assessment – will prepare students for their mid-term and final assessment and identify the competence level they have achieved on a related subject matter, the aim being to diagnose potential discrepancies in students' understanding and performance in order to make specific adjustments to the course content and procedures and/or to assign additional assignments to certain individuals or the whole group.

Home assignments – will consolidate the concepts and materials taken during in-class activities, help students to expand the content through diverse background resources and/or practise certain skill areas; they will also develop the students' ability to work individually in exploring and examining related issues.

SIS (Student Independent Study) – comprises problem solving exercises to be done by students on the independent basis. Students are supposed to use knowledge and skills acquired in class to do SIS. Assistance and advice will be provided by teachers during office hours.

Midterm test, endterm test – a diagnostic test used to identify the students' progress, their strengths, and weaknesses, intended to force student to prepare for Final Exam. It includes computer-based test.

Final examination will be in test format, and will include questions covering the entire course. Final exam designed to identify how successful the students have been achieving objectives.

The final exam is mandatory. If you miss an exam for any reason you will get 0 point for that exam.

Submission of the exam paper to the instructor upon completion of the exam is responsibility of the student. Instructor does not have to prove cheating.

Instructors may give students participation bonus up to unlimited grade of the total semester grade. All decisions regarding bonus are completely up to instructors.

DISCIPLINE

Attendance of the lectures, tutorials, and exams is strongly encouraged. No attendance record will be kept. Student who will show up later than 10 minutes after beginning of the class will not be allowed to enter the classroom.

Attention!

- 1) If student missed without plausible reason more than 30% of lessons student receives «F (Fail)» grade;
- 2) If for two attestations student receives 29.4 or less points, this student is not accepted to final exam and for all course he (she) receives «F (Fail)» grade;
- 3) If student receives on final exam 9.4 or less points, then independently on how many points he (she) received for two attestations, in whole he (she) receives «F (Fail)» grade;
In the case of missing or being late for final exam without plausible reason, independently on how many points he (she) received for two attestations, in whole he (she) receives «F (Fail)» grade.
- 4) Practical work must be uploaded to the Teams assignment. If a student fails to upload the work before the specified deadline, the work will not be considered. A score of zero is given.
- 5) All written work must be completed according to the **standard** of KBTU. The standard and template are attached to the TEAMS platform. The **Teams team** has added a video lesson on preparing reports according to standards.
- 6) All text materials are available on the <https://wsp.kbtu.kz/> and TEAMS platform.
- 7) If a student does not pass the **practice task** on time, then admission to the next **practice** will be only after the mandatory completion of the previous work. Points for previous work will be lost, but feedback will be given on correct completion.

ACADEMIC POLICY:

1. Cheating, duplication, falsification of data, plagiarism are not permitted under any circumstances!
2. Students must participate fully in every class. While attendance is crucial, merely being in class does not constitute "participation". Participation means reading the assigned materials, coming to class prepared to ask questions and engage in discussion.
3. Students are expected to take an active role in learning (the instructor will provide the information and guidelines to do this).
4. Students must come to class on time.
5. Students are to take responsibility for making up any work missed.

6. Make up tests in case of absence will not normally be allowed.
7. Mobile phones must always be switched off in class.
8. Students should always show tolerance, consideration and mutual support towards other students.

Grade		Achievement percentage	Assessment criterion
«Excellent»	A	95-100%	This grade is given when the student: - demonstrated a complete understanding of the course material; - did not make any errors or inaccuracies; - completed control and laboratory work in a timely and correct manner, and submitted reports on them; - demonstrated original thinking; - submitted control quizzes on time and without any errors; - completed homework assignments; - engaged in research work; - independently used additional scientific literature in studying the discipline; - was able to independently systematize the course material.
	A -	90-94%	
«Good»	B+	85-89%	This grade is given when the student: - Has mastered the course material at no less than 75%; - Did not make gross errors in responses; - Timely completed control and laboratory work and submitted them without fundamental remarks; - Correctly completed and timely submitted control tests and homework assignments without fundamental remarks; - Utilized additional literature as indicated by the instructor; - Engaged in research work, made non-fundamental errors, and fundamental errors corrected by the student themselves; - Managed to systematize the course material with the help of the instructor.
	B	80-84%	
	B-	75-79%	
	C+	70-74%	
«Satisfactory»	C	65-69%	This grade is given when the student: - Has mastered the course material no less than 50%; - Required assistance from the instructor when completing control and laboratory work, homework assignments; - Made inaccuracies and non-fundamental errors when submitting control tests; - Did not demonstrate activity in research work, relied
	C-	60-64%	
	D+	55-59%	
	D	50-54%	

		solely on the educational literature indicated by the instructor; Experienced more difficulty in systematizing the material.
--	--	---

This syllabus is subject to possible further changes. The date and time for the final exam will be announced by the registrar.
